IDEAS

Map of Vic

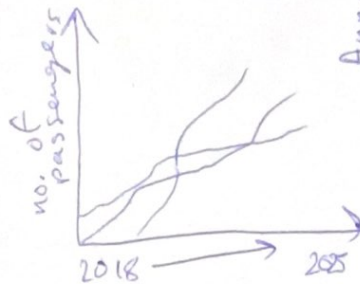

outlining different train lines

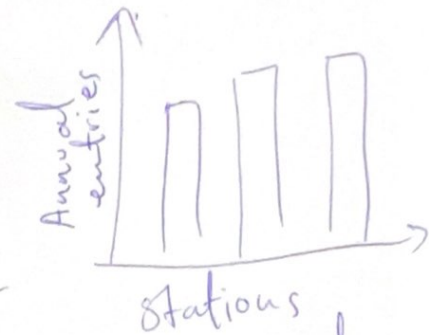

months

~	~	~	~	~
~	~	~	~	~
~	~	~	~	~
~	~	~	~	~
~	~	~	~	~
~	~	~	~	~
~	~	~	~	~
~	~	~	~	~

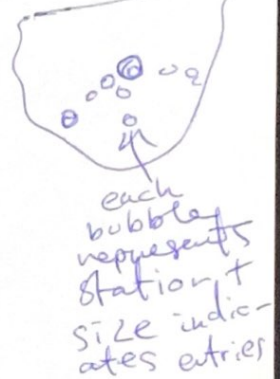

Day of week
Filter by type of day + transport mode

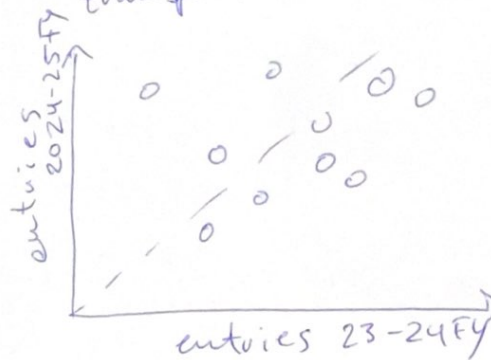

each line represents different mode of transport

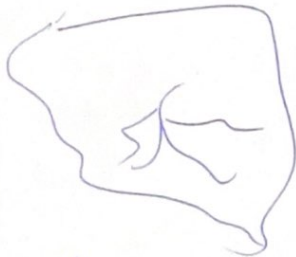

melbomelb.

each bubble represents station + size indicates entries

FILTER

Highly dense trainline areas would be hard to differentiate in regions like central Melbourne.

15/09/2025

Categorise

- Bubble map + bar chart of entries together
- scatterplot + heat map together

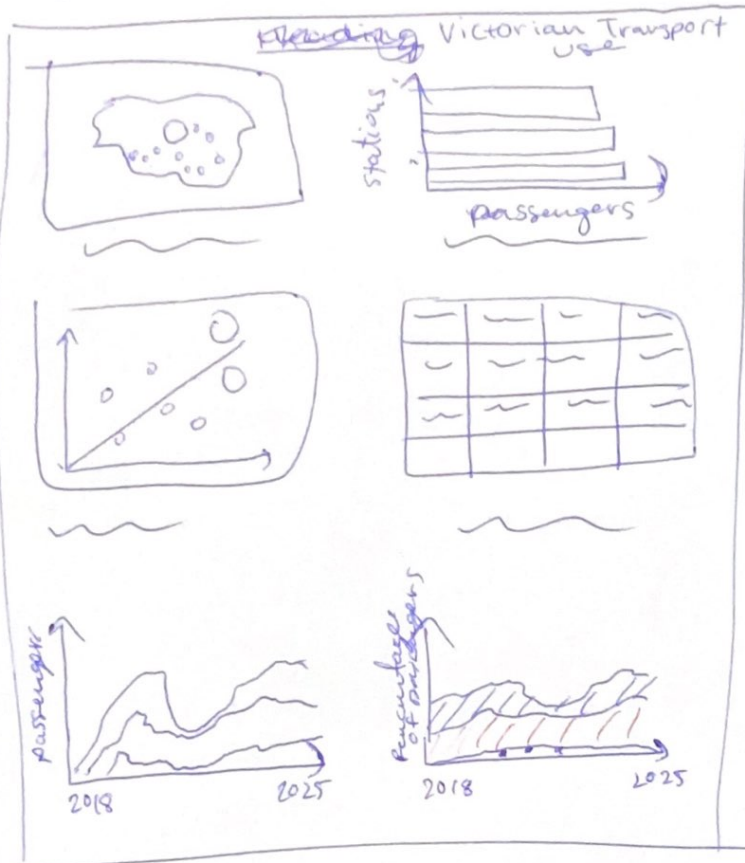

Combine & Refine

- line chart can be implemented with an area chart to show what percent each mode made up that particular month
- Make the bar chart horizontal makes it more visually easy on the eye

SHEET 2

SHARWDEEP SINGH

LAYOUT

FOCUS

- No main focus all visualisations are important
- pairing visualisation for comparison
- side by side visualisations to provide flow for user

SHARWDEEP SINGH

15/09/2025

Discussion

PROS

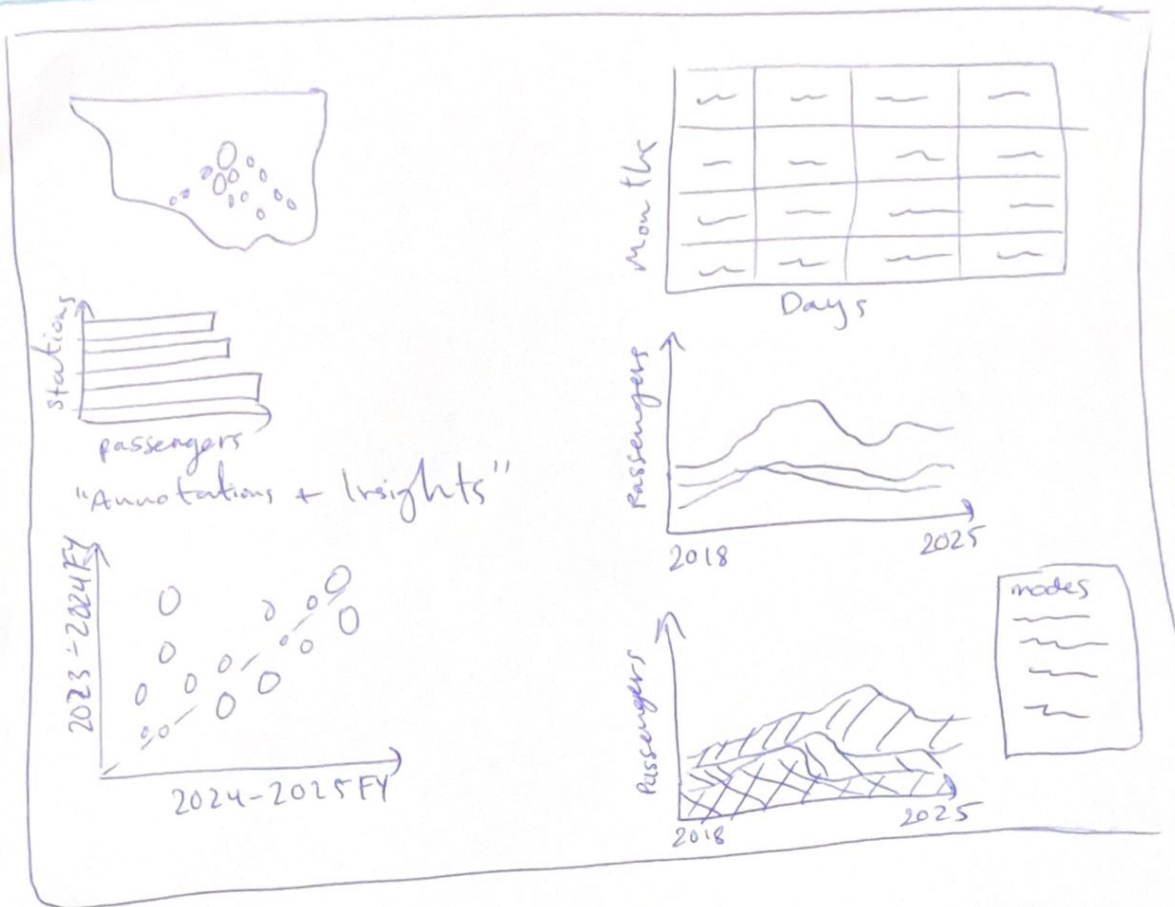

- Good variety of charts
- flow is good
- passenger entries ^{by station}
- change in passengers over time → passengers by type of day → by mode

CONS

- configuration could be improved
- size of visualisations could be too small to interpret

Operation

- legends to filter by mode in line + area chart
- slider to change minimum passengers entries to show relevant stations on map + bar chart
- hoverability
- bubble size reference for scatter plot + map

FOCUS

- Main focus is the Map to highlight key stations + bar chart
- allows for better understanding of growth of station entries as the focus is stations
- Annotation link visualisations together

SHARNDDEEP SINGH

15/09/2025

Discussion

PROS

- More space for visualisations
- allows for easy use of filters + interactions

CONS

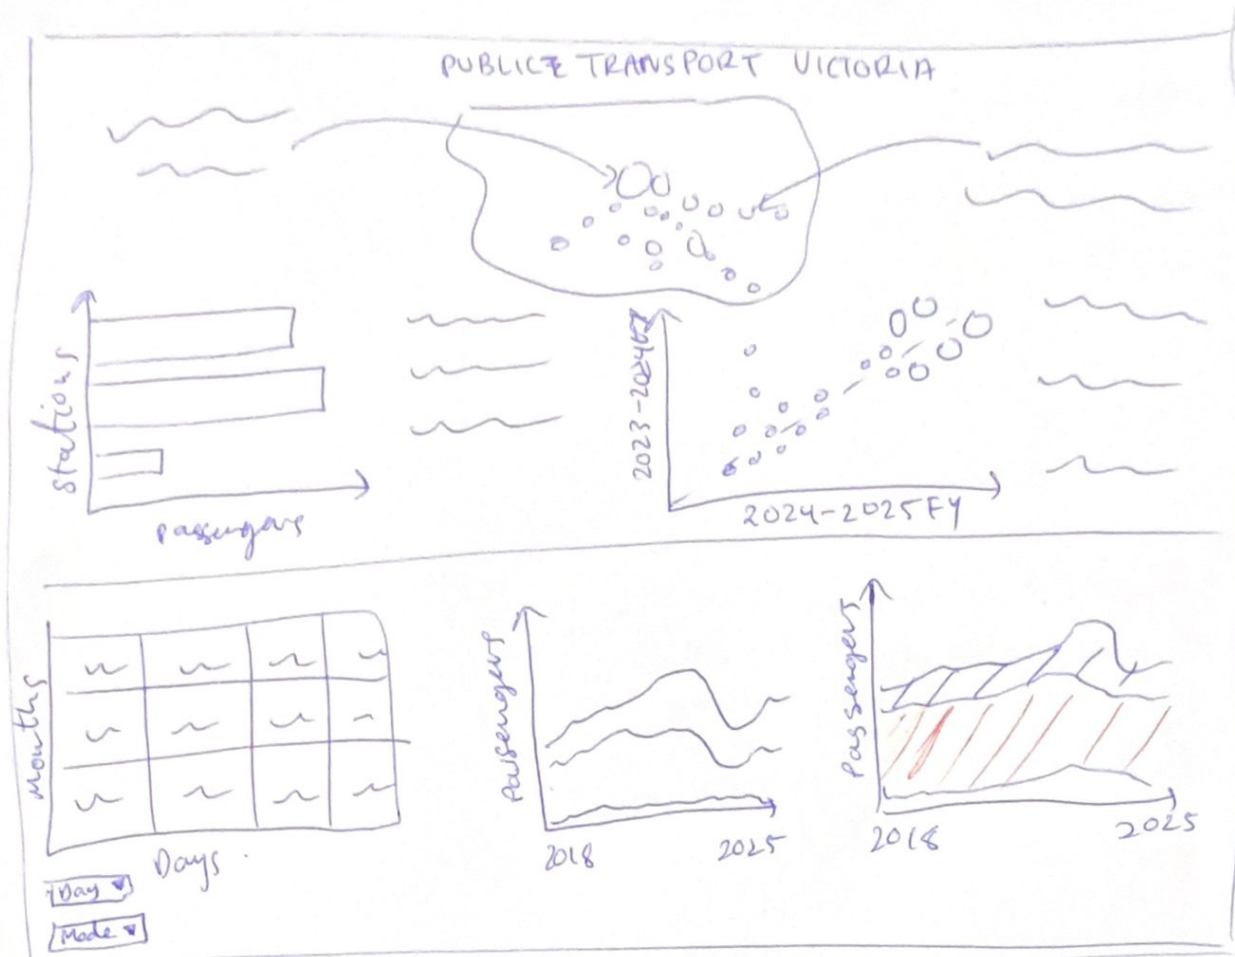

- no good flow
- don't know if to view left-right or by columns

OPERATION

- heatmap: change type of day + transport mode
- choose transport mode for line + area chart
- slider for min. passenger entries for map + bar chart + scatter plot
- hoverability

SHEET 4

LAYOUT

FOCUS

- On map of stations entries
- allows for analysis of ~~and~~ other visualisations to see change + trends
- also allows for variety of visualisation ∴ better insight

SHARNOOEP SINGH

15/09/2025

DISCUSSION

PROS

- well segmented visualisations
- easily adaptable as distinct sections

CONS

- could be too much information
- no clear flow for user to follow

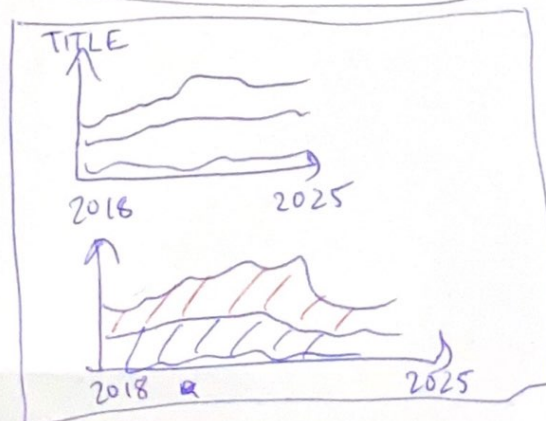

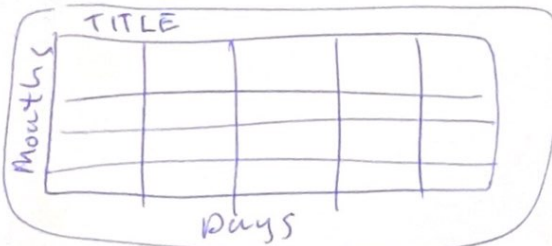

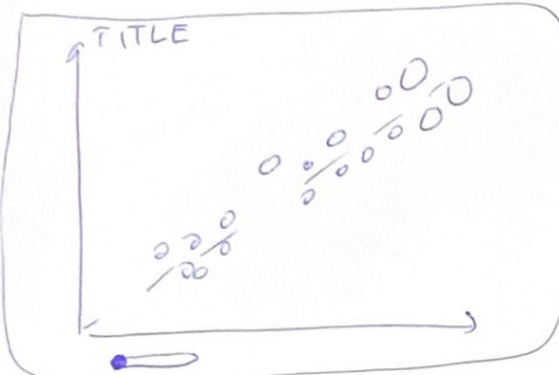

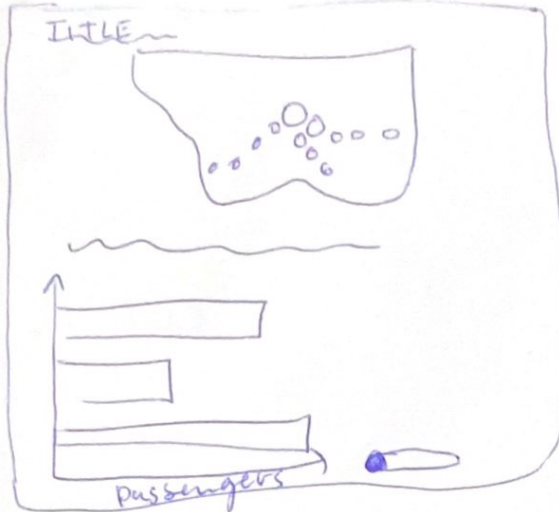

OPERATION

- hoverability (tooltip)
- dropdown for heatmap
- mode legend for area + line chart.
- sliders for top 3 visualisations to adjust minimum passenger entries

SHEET 5

LAYOUT

TITLE

Discussion

PROS

- Allows for clearly segmented sections
- flows well for storyline
- easier to compare relevant visualisations

CONS

FOCUS

- no main focus, all visualisations equally important
- flow of dashboard from station entries → station growth → entries by type of day → entries by mode of transport
- Ties all charts together ∴ coherence

SUMMARY

SHARDEEP SINGH

15/09/2025

TITLE: VICTORIAN PUBLIC TRANSPORT

designing a dashboard to see significant trends in public transport use to improve functionality

OPERATIONS

- Dropdown filters
- tooltips
- sliders
- reset buttons

Detail

dependencies;
clean + normalise data

1 week to build all visualisations

Requirements:
IDE to code
website.
